

CYNOSURE LLC

One-Page Launch Preflight

Fictional evidence sample - \$49 inquiry-only pilot

FINAL REPORT STATE

ACCEPTED AS FICTIONAL SAMPLE

Exactly three seeded findings reproduced in two clean-start runs.

REPORT ID

CYN-PREFLIGHT-20260730221258-3D2E3B

RUN ID

RUN-20260730221258-6CA8F0E8

FIXTURE

harborline-launch-notes v1.0.0

RUN TIME

2026-07-30T22:13:06.050Z

DURATION

7.62 seconds

CONTROL

Private synthetic fixture - no client work

NOT A SECURITY ASSESSMENT, CERTIFICATION, OR OUTCOME PROMISE

BOUNDED START-READINESS RECORD

What was authorized

This sample uses one owned loopback fixture and invented content.

AUTHORIZATION BASIS

owned private synthetic fixture

ACTUAL RUN URL

<http://127.0.0.1:55735/fixture/harborline-launch-notes/>

FICTIONAL METADATA HOST

harborline.invalid

INTENDED VISITOR

fictional small-team operations lead

PRIMARY ACTION

View the sample checklist

START READINESS

Ready for private synthetic testing only; publication and selling remain blocked.

TEST BOUNDARY

No form, price, login, payment, testimonial, analytics, cookie, external request, third-party asset, credential, or customer data exists in the fixture.

POINT-IN-TIME OBSERVATION

Method, exclusions, and disclosure

CHECKS PERFORMED

HTTP status; title; description; canonical; robots; 320, 768, and 1440 rendered widths; primary-action label, destination HEAD response, programmatic focus, and non-activating trial click; immediate first-party HEAD checks; console and request errors; screenshots; and diagnostic Lighthouse indicators.

EXPLICITLY NOT PERFORMED

No form submission, real CTA click, login, purchase, private-page access, source review, analytics access, credential use, customer-data handling, security scan, implementation, certification, or outcome forecast.

FICTIONAL-SAMPLE DISCLAIMER

FICTIONAL SAMPLE. This report uses a private synthetic page and invented content. It is not client work and does not describe a real company, visitor, launch, product, customer, or result. Findings are bounded point-in-time observations of the listed fixture, run, viewport, and environment. This is not a security assessment, legal advice, certification, accessibility-conformance determination, comprehensive SEO audit, or promise of ranking, traffic, conversion, leads, sales, or revenue. No form, login, purchase, private page, analytics account, credential, or customer data was accessed. Suggested changes are options for owner review; implementation and results are outside scope.

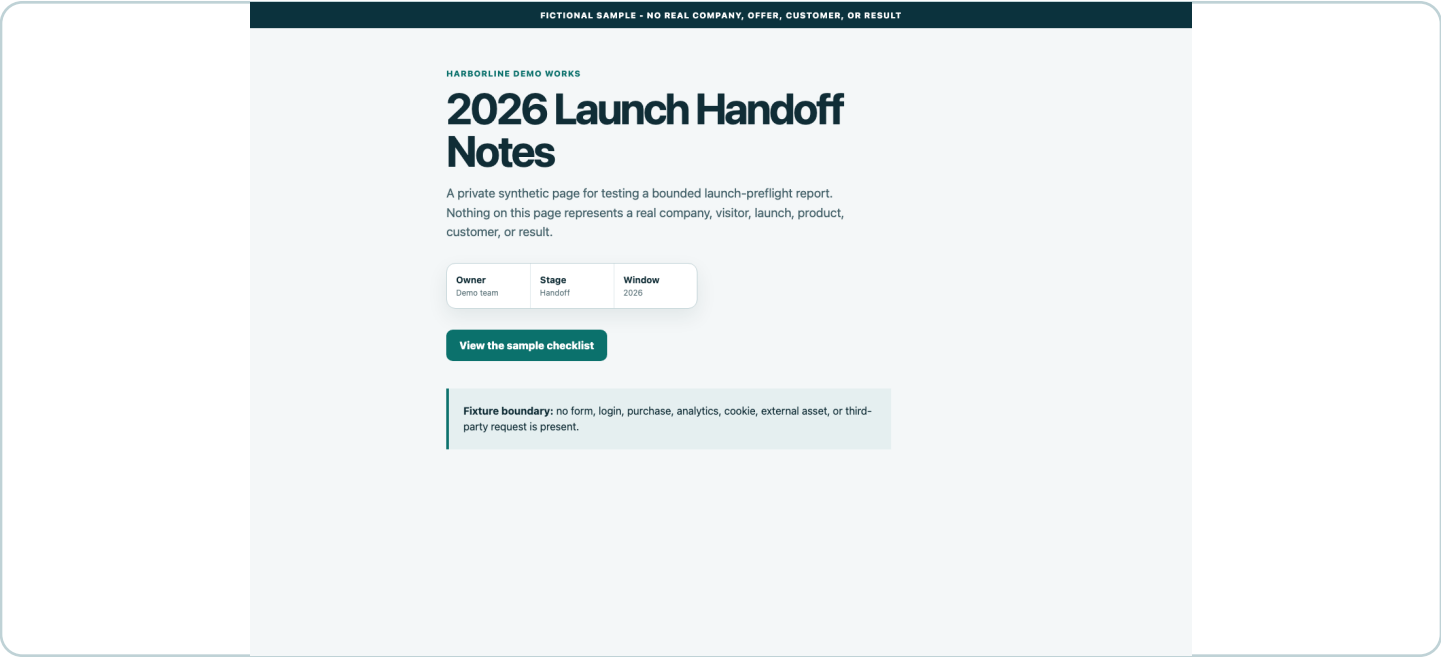

AUTOMATION AND AI DISCLOSURE

Automated browser checks collected page status, rendered widths, link responses, metadata, programmatic-focus captures, console output, and Lighthouse indicators. The runner initiated bounded GET and HEAD requests, viewport changes, programmatic focus, a non-activating trial click, and screenshots; it did not make a real CTA click. Authorized GET or HEAD requests may be logged or may mutate a poorly designed server. AI assistance organized recorded evidence and drafted report wording. AI output alone is not evidence. A finding is included only when its stated observation, reproduction steps, and evidence IDs agree with deterministic output or an unaltered raw capture.

RECORDED OBSERVATIONS

Evidence snapshot

Scores are diagnostic indicators only; they are not grades or certifications.

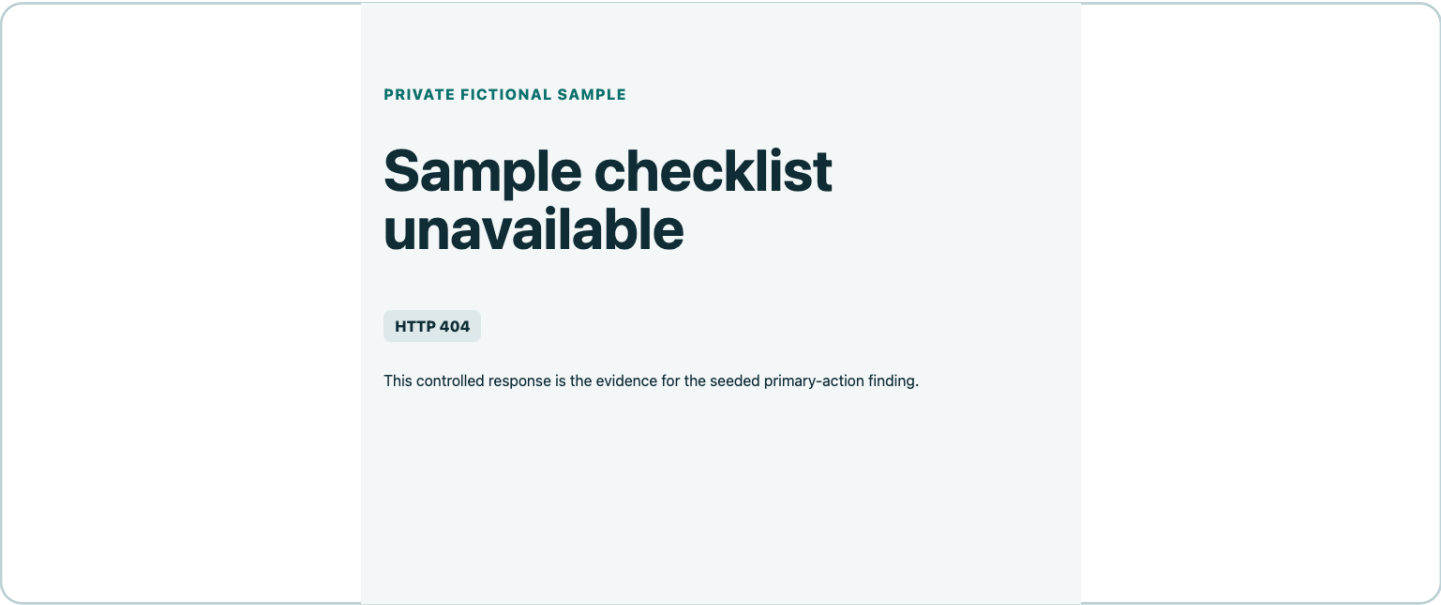

PAGE RESPONSE	HTTP 200
TITLE	2026 Launch Handoff Notes Harborline Demo Works
DESCRIPTION	Register for Harborline's 2025 live launch briefing.
WIDTHS	1440: no overflow 768: no overflow 320: 84px overflow
PRIMARY ACTION	One visible link; HEAD 404; no real click
CONSOLE	0 warning/error records
LIGHTHOUSE	RUN_DIAGNOSTIC_ONLY - v13.4.1

PRIORITY 1 - PRIMARY_ACTION_UNAVAILABLE

Primary action does not reach an available page

OBSERVATION

The controlled fixture returned HTTP 404 to both the bounded HEAD check and the separately captured synthetic GET.

EXPECTED STATE

Every visible instance of the declared primary action resolves to the same available destination.

BOUNDED SUGGESTION

Point the primary action to the intended available checklist page after owner review.

RETEST CONDITION

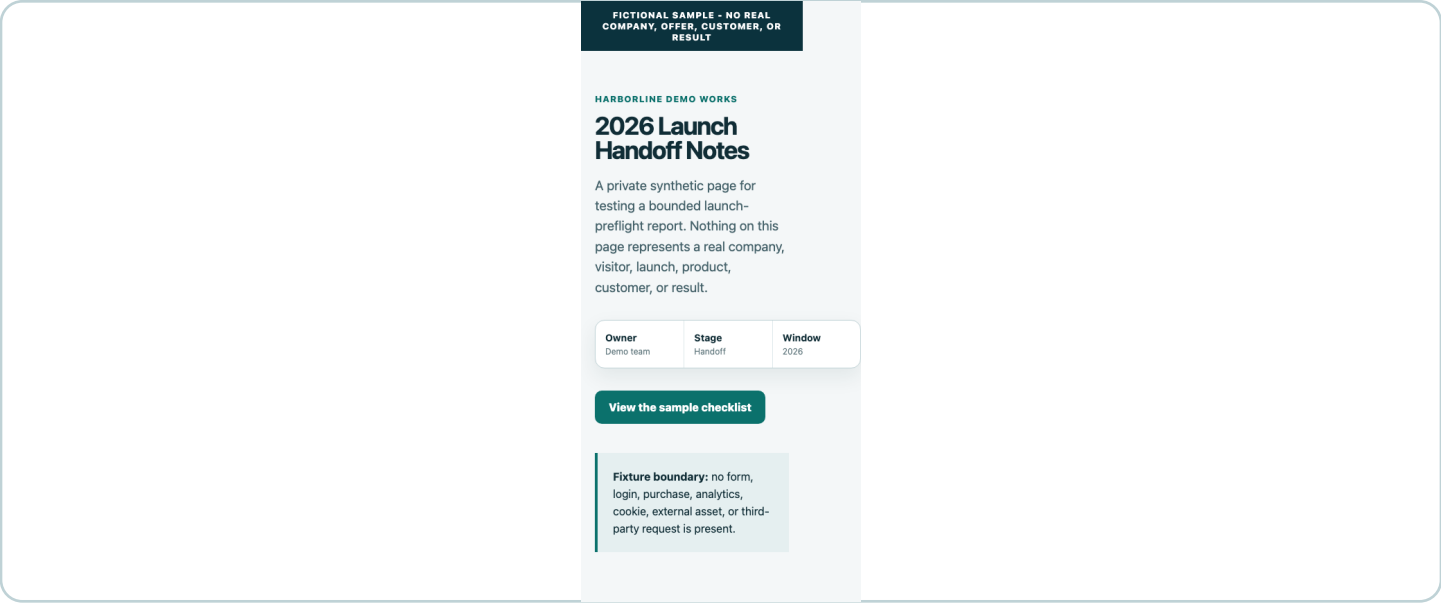

The exact primary-action label is present and its approved same-site destination returns 200.

PRIORITY 2 - HORIZONTAL_OVERFLOW_320

The page overflows horizontally at 320px

OBSERVATION

The viewport was 320px while the widest rendered document measurement was 404px.

EXPECTED STATE

innerWidth, body scroll width, and document scroll width all equal 320px.

BOUNDED SUGGESTION

Replace the fixed-width summary strip with a responsive width or stack it at small viewports.

RETEST CONDITION

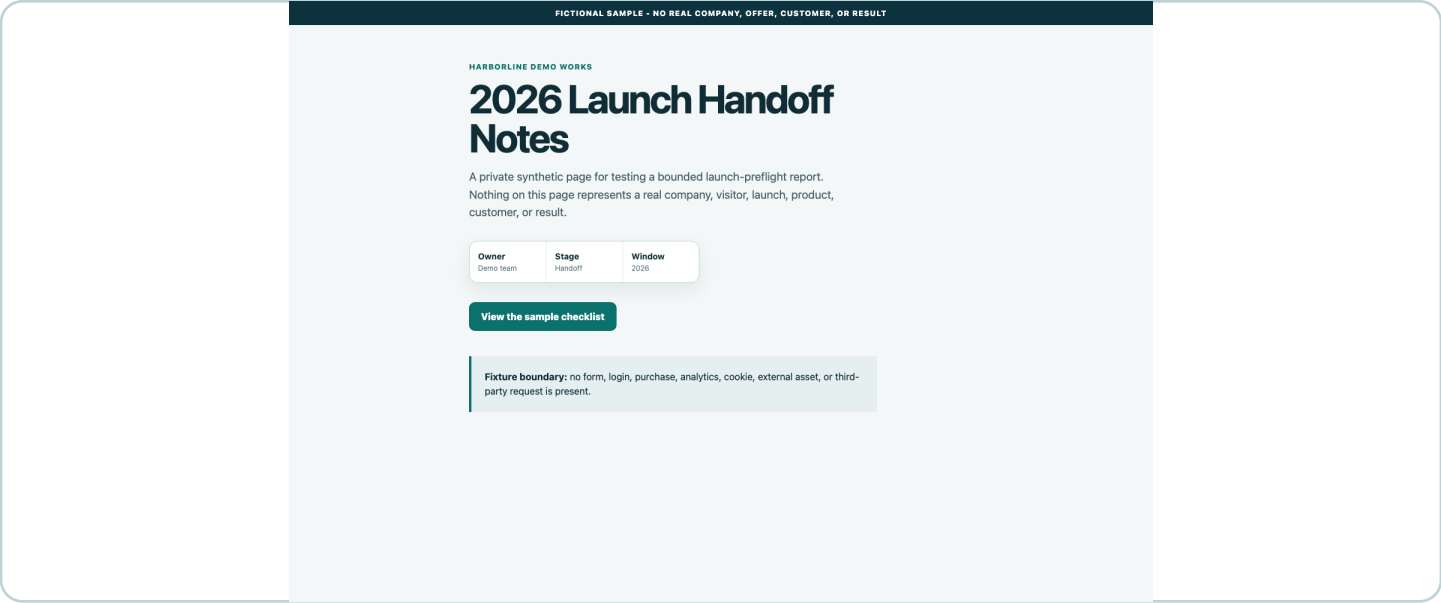

At 320px, innerWidth, body.scrollWidth, and document.scrollWidth all equal 320.

PRIORITY 3 - DESCRIPTION_MISMATCH

The description conflicts with the visible page

OBSERVATION

The observed description reads "Register for Harborline's 2025 live launch briefing.", which does not equal the declared expected description.

EXPECTED STATE

The page has exactly one current description: "Private 2026 launch handoff notes for the fictional Harborline Demo Works sample."

BOUNDED SUGGESTION

Replace the stale or missing description with the declared current description.

RETEST CONDITION

Exactly one description equals the declared current description.

BOUNDED OBSERVATIONS ONLY

No issue observed in this run

This table does not state or imply compliance, optimization, or certification.

Initial page	HTTP 200 from the controlled fixture.	E-NAV-01
1440px width	No horizontal overflow observed.	E-VP-1440
768px width	No horizontal overflow observed.	E-VP-768
Canonical	Exactly one same-fixture canonical observed.	E-META-02
Robots	noindex,nofollow plus X-Robots-Tag noindex, nofollow observed.	E-ROBOTS-01
Programmatic focus	Primary action accepted programmatic focus with a visible outline.	E-CTA-01
Console	No console warning/error or page error observed.	E-RUNTIME-01
Network isolation	Only 127.0.0.1 was validated; no external HTTP(S) request was recorded.	E-NET-01

CHECKSUMMED PRIVATE BUNDLE

Evidence manifest and closeout

Full SHA-256 values are retained in MANIFEST.sha256 beside the report.

ACCEPTANCE RESULT

ACCEPTED AS FICTIONAL SAMPLE

Two clean-start runs produced the same normalized three findings. Evidence IDs map to retained control records or raw captures. The runner initiated bounded GET/HEAD requests, programmatic focus, a non-activating trial click, viewport changes, and screenshots. GET/HEAD requests may be logged or may mutate a poorly designed server. No external HTTP(S) request, form submission, real CTA click, login, purchase, customer data, or credential use was recorded. Publication and selling remain separate blocked gates.

The final PDF hash is external by design and is recorded in MANIFEST.sha256.
